Re: KGMG (FM), Oracle, Arizona  
Facility Identification Number: 57504  
Journal Broadcast Corporation  
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed July 23, 2010, on behalf of Journal Broadcast Corporation ("JBC"). JBC requests extension of the special temporary authority ("STA") granted on February 1, 2010, to operate Station KGMG with emergency antenna facilities pursuant to Section 73.1680.<sup>1</sup>

In support of the request, JBC states that the licensed antenna supporting tower collapsed in an ice storm on January 22, 2010. JBC states that the tower owner has completed construction of a replacement tower, and that it is in the process of surveying the new tower so that its replacement antenna, which has been ordered, can be adusted for proper directional performance.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has been prevented from restoring licensed operation due to causes beyond its control and has taken all possible steps to expeditiously resolve the problem.

---

<sup>1</sup> KGMG is licensed for operation on Channel 292C2 (106.3 MHz) with effective radiated power of 0.44 kilowatt (H), 0.43 kilowatt (V), (Max-DA) and antenna height above average terrain of 1272 meters.

Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KGMG may continue to operate with with an emergency Jampro, single-bay antenna mounted at the top of an existing 10-meter tower which is immediately adjacent to the tower which collapsed, with reduced effective radiated power not to exceed 0.098 kilowatt. JBC must notify the Commission when licensed operation is restored. JBC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **February 24, 2011**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller", with a long horizontal flourish extending to the right.

Charles N. Miller, Engineer
